

The Azichem production includes **6 functional lines with over 200 items**, including direct productions and materials marketed exclusively for Italy, which cover innumerable requirements regarding the structural restoration of civil and industrial works and infrastructures, dehumidification and thermal insulation, the historical-monumental restoration, waterproofing of new or existing structures, immediate stop of water infiltration, steel and synthetic fibres, additives for concrete, Anti-shrinkage cement mortars for high precision structural fixings, and much more!

This is why Azichem is now among the leading Italian manufacturers of specialist materials and innovative technologies in the building and green building sectors.

	Products for the waterproofing and sealing of building works
	Products for new homes and the restoration and maintenance of residential buildings
	Main, complementary products and accessories for the construction, restoration and/or revitalisation of concrete floors and screeds
	Products for industrial, infrastructural and large-scale construction
	Products for restoration, structural consolidation, seismic adaptation and dehumidification
	Natural products for green building, ecological restoration, thermal insulation and energy saving

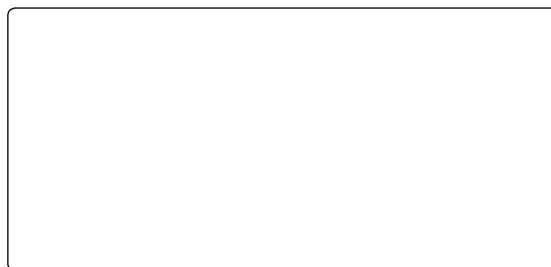

Azichem srl is a highly specialised company, certified according to the international standard **UNI EN ISO 9001:2015**, constantly engaged in research and development of innovative technologies and products for specialised building and green building.

Azichem has been producing and selling its formulated products since 1987.

Over the years, Azichem has always set and qualified its work on the basis of solid and long-lasting relations with customers and suppliers, placing importance not only on simple product sales, but also on problem-solving and an exceptional pre and after sales service.

AZICHEM'S HOME

IDENTIFIES THE OPERATION THAT REFLECTS YOUR **PROBLEM** TO DEAL WITH.

WE WILL INDICATE YOU THE **PRODUCT** OR THE MOST SUITABLE **SOLUTION** FOR SOLVING IT.

www.azichem.com

- 1) Structural restoration and coating of artefacts and masonry by spritz-beton of fibre-reinforced structural mortars.
- 2) Water repellent consolidating solutions for masonry.
- 3) Products for chemical barriers against capillary rising damp.
- 4) Injectable, expansive slurry for wall consolidation.
- 5) Natural consolidating solutions for powdery plasters.
- 6) Waterproofing-plastic cementitious compounds for terraces and balconies.
- 7) High performance breathable, fibre-reinforced plasters.
- 8) Anti-dust consolidating treatments for concrete floors.
- 9) Natural, dehumidifying, macroporous, fiber-reinforced plasters.
- 10) Coloured mortars for the construction of exposed masonry.
- 11) Products for the restoration of degraded concrete.
- 12) Osmotic waterproofing compounds.
- 13) Waterproofing with very high elasticity based on hot vaporised pure polyurea.
- 14) Paints, plasters and breathable and water-repellent coatings.
- 15) Transparent, non-pellicular waterproofing for terraces and balconies.
- 16) Natural, breathable, dehumidifying thermal plaster for making insulating coats.
- 17) Hydro-expansive waterstop in sodium bentonite.
- 18) Thermal, dehumidifying, natural, specific interior plasters.
- 19) Waterproofing layers in sodium bentonite.
- 20) Injectable hydroreactive resins, for the immediate stop of infiltrations.
- 21) Ecological products for the final cleaning and removal of moulds, mosses, lichens, etc.
- 22) Hi-flow cement mortars, expansive, for precision anchoring and reinforcements.
- 23) Reinforcements and structural adjustments with carbon fibres.
- 24) Adhesives and fillers for tiles.
- 25) Grouts and complementary products for the construction or repair of floors and screeds.
- 26) Enamels for swimming pools and surfaces in permanent contact with water.
